

# THE STEEL STACKER

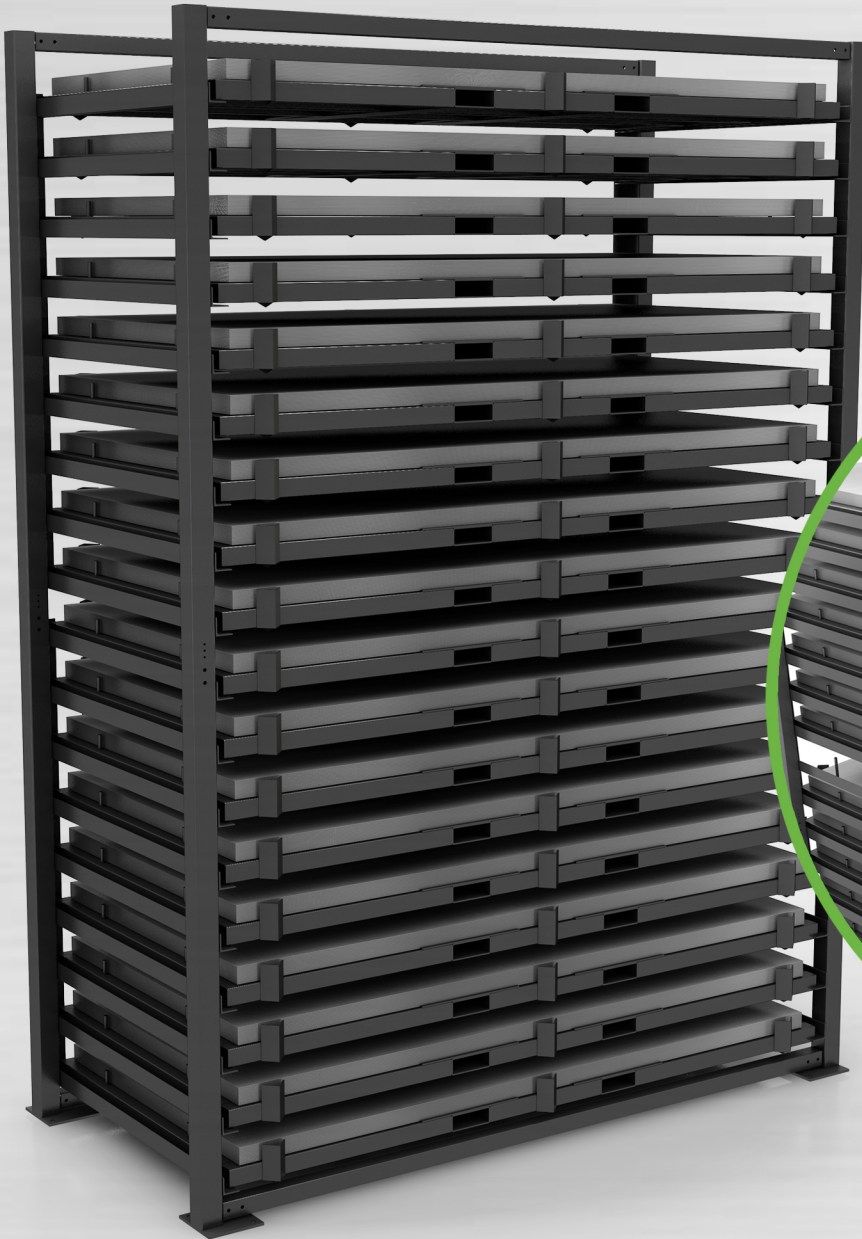

Sheet Metal Storage and Staging methods of storing and staging sheet metal can be costly in terms of space usage and material handling processes. The Steel Stacker offers a streamlined approach to material handling and storage, leveraging advancements in laser and punching machines to improve efficiency.

## FEATURES OF THE SYSTEM:

- Manual Cartridge System
- Floor Space Optimization
- Increased Efficiency
- Safety Enhancement

## BENEFITS:

- Cost Savings
- Efficient Workflow
- Safety Improvements
- Facility Optimization

The proposed manual cartridge system offers a comprehensive solution to the challenges associated with sheet metal storage and staging. It leverages advancements in manufacturing technology to create a more efficient, space-saving, and safer working environment, aligning with modern manufacturing practices and lean principles.

## Specifications:

- 189.5"H x 137.5"W x 66.7"D
- Powder Coated Black
- Made from steel
- Hold 4000 lbs. per shelf
- 18 shelves per unit
